INSTALLATION CHECKLIST

- Computers without a CD drive can download the driver or copy the contents to a flash drive from another computer
- Compatible with a USB 2.0 or 3.0 port. A USB 1.x port is not recommended
- Disable all other wireless access on your computer before installing
- Close all unnecessary programs before installing
- Install the software BEFORE plugging in the adapter (except Win 10 OS)
- Install the utility in addition to the driver to configure the adapter with Windows XP, Vista, and older versions of 7
- Do not connect the Wireless AC adapter through a USB hub
- Administrator access on your computer may be required for installation
- Wi-Fi Protected Setup (WPS) is supported with a compatible router. The MediaTek utility also supports WPS pin setup.
- Installation requires the SSID (network) name and may require type of security encryption, and the security password to configure the adapter
- Reboot your computer after installing the software
- Never disconnect the adapter while data is being transferred
- Use the 'Safe to Remove Hardware' feature whenever possible
- The adapter must be inserted into the computer to uninstall the software
- Consult the User Manual on the CD for more detailed installation information

Troubleshooting Tips

- **My computer cannot read the CD:** Locate the CD in Explorer and copy the contents to the desktop
- **My computer does not recognize the adapter:** Uninstall and re-install the software BEFORE connecting the adapter (Win 10 OS has the driver). Check that the green LED is active. Try a different USB port. Do not connect through a USB hub.
- Check the **Control Panel > Network and Sharing Center** to see if the computer recognizes the adapter. Click on '**Troubleshoot problems**'.
- A wireless USB mouse or keyboard dongle may cause interference. Try a non-adjacent USB port to test, if possible.
- Disable all other wireless access on your computer
- Unplug the adapter, reboot the computer and reconnect the adapter
- Consult the off-line help guide **?** of the Mediatek utility
- **My connection speed is too slow:** Check the wireless speed of the router or public hotspot. Check that nothing is blocking the adapter antenna. Check the strength of the wireless signal in the Mediatek utility
- Consult the User Manual on the CD for more detailed information. A PDF version of the user manual can be emailed to you

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

Warranty Information

This product is backed by a limited one-year warranty. In addition, Cable Matters warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replaced with equivalent products at our discretion. The warranty covers parts and labor costs only. Cable Matters does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall Cable Matters Inc. (including their officers, directors, employees or agents) be liable for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of, or related to the use of this product exceeding the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.
